Powerware 3105 Drivers For Mac

This was followed by a cloud of magic smoke, and I had to write off a desktop I called the 1-800 number in the manual, and reached someone who said they would call me back in the morning, which they never did.. Powerware 3105 Drivers For Macbook ProLanSafe software performs graceful network shutdown for individual.. Does anyone have any idea of how to resolve this problem? What I would like is for a shipping account number, to send back the bad unit, and have them Fedex out a new unit, as well as the cost of the desktop.. This model does not have any voltage adjustment, it does have some self tests which it seemed to pass.. A few days ago I purchased a PowerWare 3105 ups, after following the instructions, I plugged in my computer and heard the loudest bang I have ever heard from a computer.

Luckly I ordered from Amazon which has agreed to refund me shipping, and the cost of the unit, but so far the cost of the desktop is still in the negotiation phase.. The sad thing is I did some research and searched the forums many people mentioned that Powerware was a good brand, and had a good following.. Powerware 5110 or 3105 For Windows, Novell, MacOS X, and most Unix platforms Mac software list.. Powerware 3105 Drivers For Macbook ProThe next day I emailed them and got an auto response which said they should respond within 72 hours, or call the 1-800 number so far I have had zero luck in getting a response.. I did do a site search but did not find any warranty claim amounts, other than the standard two year warranty on the unit, but no mention of equipment loss or other cost associated with a problem with the unit.
